Concerning those most Excellent

PILLS,

CALLED

Pilule Radii Solis extractæ :

Being an Universal MEDICIN, especially in all Chronical and difficult Distempers; as by the ensuing Discourse will most clearly appear.

Truly and only prepared by me Lionel Lockyer, Licensed Physician; and by me faithfully communicated unto Mr. Tho. Fyge Apothecary, and Mr. John Watts my Nephew which resides with me in my House, and unto none other; from whom only, and from such which they shall appoint, you can have this true Solar Preparation after my Decease.

Courteous Reader,

HAVING through the Blessing of God, (from whom alone cometh every good and perfect gift) been so successful in my endeavours, especially in the Chymical Preparation of Minerals, which hath been found, and is generally

acknowledged by the most experienced Practitioners in all ages, to be most effectual for the extirpating and rooting out the ground of all Chronical Distempers; which, for the difficulty of their Cures, arising from the want of good Medicines, are generally the shame of Physicians.

Having, I say, (through his goodness) attained to the singular preparation of a Medicine thence, which for its excellent efficacy deservedly merits that Title; by which I would more peculiarly express, or give you to conceive by way of Analogy, of its excellent properties, which are of a solar nature, dispelling those Causes in our Bodies, which continued, would not only darken the Lustre, but extinguish the Light of our Microcosmal Sun: which however, that it may more perspicuously appear, I shall give you to understand its Medicinal Properties, which I in my self have experienced for confirmation of the same.

I cannot but commend this Medicine to all tender Mothers of children, which although they seem to be very lusty, yet are suddenly snatched away by death, having the Convulsion Fits, and in this Distemper you may give to a child of a month old, the eighth part of one of these Pills in a little of the Mothers Breast milk; and after resting three or four days, you may safely give it the child the second time: but if in process of time it shall so happen that the Fits return again, you may increase the Dose, and give the child a little more then at the first time, and so continue as the child's body can bear, until the disease be totally vanquished. And here I cannot but pity the ignorance of some Physicians, which I have known in other Countries, that have given to an Infant new-born a Wine-glass full of water, with a little Peasl beaten to powder, or the powder of *Beasar* Stone, which are Medicines of no virtue at all to prevail over such diseases.

This Medicine is far more secure, safe and effectual, than all other Medicines whatsoever; for it resists and prevails against all the obstructions of the Spleen, which is the common Sewer or Scavenger of the body; as namely, for Melancholy, and also all obstructions of the Liver, the which unre-moved corrupteth the Blood, from whence flow grievous diseases, as the continual pain in the head (the which cauleth many a young Mlad to descend into her grave, there being the vacuity of the course of Nature.) In Women the Suffocation of the Matrix, Suppression of the Monthly Flowings, Tremblings, Palpitations of the Heart, Swooning, Vertigo of the Head, and especially that hideous Torment, (in that part commonly called) the Mother; Feavers, Leprosie, Gout, Falling Sickness, Dropsie, Frensie, Vertigo, the Palsie, Rheums, Deffluxions, Headach of all kinds, Convulsion-fits, Difficulty of Breathing, Stoppage of the Stomach, Cough, Piffick, Inflammation of the Lungs, Consumption, want of Appetite, bad Digestion, pain in the Stomach, Worms of all kinds, the Scurvy, Colick, Inflammation and Obstruction of the Liver, Corruption and Putrefaction of blood, Jaundies Black and Yellow, hard Swellings, Tympanies, Pain and Inflammation of the Spleen, Overflowing of the Gall, Tremblings of the Heart, Swoonings, Stoppage and Scalding of the Urine, Bloody-flux, Gravel and Stone in the Reins and Bladder, Rickets in children, Kings-eil, the *Gonorrhæa* or Running of the Reins, the violent Hectick Feaver;

Agues

Agues: Quotidian, Tertian, Quartan; Green-sickneſs, Fiſtula, the Cancer, the Hemeroids and Piles, Stopping of the Terms and Whites. It exalts the Generative virtue, cleanses and ſtrengthens the Spermatick Veſſels, reſiſts all foulneſs and infection in the act of Generation. It muniſieth and cleanſeth the Skin, reſtoreth and increaſeth Beauty, makes old Age comly and beautiful, and the countenances of all to be chearful and ſanguin, and is an Antidote againſt infectious Diſeaſes; although I have mentioned many Diſeaſes, I might have ſaved that labour, for of all theſe and many other ſuch like Diſeaſes known and unknown, being without name or number, this Medicin is a full and effectual healer. The Pills may be taken alone; and if the Doſe be preſiſely obſerved, the Operation will be almoſt Inſenſible becauſe it works ſo gently, that it is a Reſtorative to Nature, it reſtores the Radical Moiſture, which is the Magazin of Life, and in a wonderful manner expels all that is noxious out of the body, and will not leave a ſlutiſh corner unſwept in any part thereof.

It is a Prefervative from all Accidents, as contagious Airs, for it ſtands Sentinel in the body, and will not admit any enemy of Nature to enter: if you increaſe the Doſe, Its Operation will be the more active and viſible, exerciſing its Virtues upon the body by expelling the Diſeaſe; ſometimes it works upward, and ſometimes downward, and may be both ways at once: For it ſweeps every hole clean, and carrieth away what thing ſoever is offenſive or deſtructive to Nature. And according to the Doſe, it works more or leſs, but always without any violence: I have ſeen it conquer many peoples Diſeaſes in a very ſmall Doſe, and without any viſible Operation.

It demoliſieth and vanquiſheth moſt, if not all manner of Diſtempers, notwithstanding there are certain Infirmities which have been of long continuance, which have taken root as it were in the body, and theſe do require a more viſible Operation, and cannot be expelled with a ſmall Doſe.

It is excellent againſt the Leproſie, and ſuch like deteſtable Diſeaſes where no part is found: there is not in the world a ſurer, ſafer, more efficacious and ſpeedier Remedy, provided that Nature be not utterly ſpent in them that take it.

And as for that irkſom and unclean Diſeaſe, ſo commonly called the POX, there is nothing more ſafe and ſure, ſo that the Patient take it in a proper Doſe: that is, he begins with two Pills, and ſo increaſing one Pill every day, until he comes to ſix or ſeven, that he may ſweat, and that the Medicin may have its Operation both by Vomit and Stool, and ſo continuing, without reſting one day in a week, and the Cure ſhall be very well perfected upon him without any other means at all.

Now the great difficulty many men make in curing of this Diſeaſe, and the great charges they put people upon, make them ſlow, and aſhamed to go to any for a remedy until they are almoſt rotten, which I know might be prevented, if the party at the firſt feeling of himſelf ill will take but one of theſe Boxes of Pills.

The Gout, Leproſie and Dröpiſe, are eſteemed Diſeaſes for the moſt part incurable.

Pilulæ radii solis extractæ.

incurable: towards the cure of which and such Diseases, this Medicin is wonderful prevalent beyond credit, and it worketh in a short time more than any Medicin in the world ever did, for in a very short time it extracts from the whole body all turbulent, pestilentious, infectious humors, and that many times insensibly, and yet fully and perfectly, but often so mildly, that it is hardly perceivable; and so all true Cures should be wrought: it is not convenient (but destructive) to lay violent hands upon Nature; for all her ways are gentle and mild, and so should her Cures be.

And so in the cure of the Gout, though the wringing Pains thereof are intolerable, but it shall day by day hereby be a little mitigated and allwaged, the Fits every day decreased, and return not so frequently as at the first, and gradually vanish quite away never to return again, which is a blessed riddance. They that are well, and desire so to be, let them take the Pills once in a Week.

Now all that take these Hills for the Gout and Dropisie, let them take three or four Pills every day. Many people of late after they have lost their Agues, have been very much troubled with the swelling in their Legs, which this Pill hath soon cured, and if they had taken it sooner, it would not only have cured the Ague, but prevented the Swelling in their Legs.

Also a most wonderful Operation it hath to prodnce Fertility or Fruitfulness in the most barren of Women, provided the cause be in themselves. This (Gods appointed time being not come) is able to withstand it. This Pill is very necessary for these that take long Voyages to Sea, as to the *East* and *West Indies*, in which Voyages, both the Soldiers and Mariners are much weakened and sorely troubled with the Scurvy, and have no Remedy with them, that can do them any or very little good; whereas this Pill will enable them to finish their journey with joy and comfort, both going thither, and also coming home, by the blessing of God.

Truly in the Universal Nature I have not hitherto found any Medicin near equal to this, by many degrees, which doth so effectually resist all Putrefaction both of Bloud and Bowels; and this Medicin both Soldier and Mariner may carry, though never so far. It resists also all Obstructions, the prime cause of most Infirmities. Also it never corrupts, though kept an hundred years, which Drugs will quickly do, and lose both savour and virtue. But this, as I said and say again, is a sure Medicin, always at hand, easily administr'd and administrable: In the effects there is no Medicin in the whole world more healthful.

The Mariner who continues at Sea many months, and the Soldier in the Camp, suffering there all possible or imaginable inconveniences, cannot want, because this is a Medicin without a Plaster, it is in itself instead of a Plaster and will cure wounds or old Ulcers being taken inwardly, therefore Chirurgions in Ships, and they in the Camp, should take care to be provided with this one Medicin above all other; for by it they might preserve the lives of thousands of Mariners and Soldiers, which are under their care and tuition, and one only Ounce alone of these Pills, which is but a very small price, will make above an hundred Doses, and cure the sick with more facility than they can do otherwise by all their Art, though furnished with Chests full of Medicins; yet not
valuable

valuable in comparison or competition with this, If Physicians or Chirurgeons in the Camp or Navy, were provided but with some few Ounces of these Pills, they might save the lives of ten thousands, which miserably perish through want thereof. It is the duty of a General of an Army, to provide for the Soldiers under his Command, for when they are afflicted with the Plague, Scurvy, Fluxes, and other Epidemical Diseases, they fall like leaves in Autumn from the trees, or like flies in Winter, when the cold weather comes, they die by heaps for want of help, whereas this incomparable Medicin might save the lives, if not of all, yet the greatest part of them. For this very cause, and in commiseration of mankind, who is subject to so many casualties and infirmities, I will hereafter be sufficiently stored with this Medicin, which God hath blest my study and labors with, which many Rabbies have inquired for, and mist, and; now I publish it, that they which will, may make use of it. It is a Medicin so useful powerfull and precious, and yet not costly, that there is not the like.

A word or two to my kind Country-men, that live in Country Villages far from Physicians or Apothecaries: When sickness comes upon them, their wives, children or servants, then for a *Carduus Posset*, and if that do it not, they are in a straight, and know not what to do; whereas if they had but one of these Boxes of Pills, they might do their family much good, and their poor Neighbours which are about them, if the Lord gave them hearts so to do; and in so doing, you shall manifest your selves to be like unto our Saviour Christ, of whom the holy Scriptures record, *That he went about doing good*, Acts 10. 38. And this is the practice of some Merchants in this City, and likewise some Gentlemen in the Country, which have many Boxes of these my Pills, to give away to poor people.

If any man shall imagine or presume upon my Commendation of this Pill, that therefore any Disease though never so inveterate may be removed, he is deceived, and in this doth err; for I speak here only of such Diseases as by natural means and Gods Blessing may receive and admit of cure, for in some cases the internal parts, the bowels, are so stuffed and obstructed with ill Humours, that no Medicin will prevail, in some their Lungs are rotten and purrified, and the Liver also, before they think of a Physician, or call for help. In such a case, what Physick can help or restore a principal member, when it is quite lost, or make new bowels when the old are perished?

And sometimes it pleaseth God to strike a man immediately with a Disease which no man can heal, whereof divers examples are extant in the Word of God, as we may read of *Jeboam*, it is said, *That the Lord smote him in his bowels with an incurable Disease, and in two years his bowels fell out.* 2 Chron. 21. 18. Likewise *Jeroboams hand dried up*, 1 King. 13. And likewise *Gehazies Leprosie*, 2 Kings 5. 27. Acts 12. 13. and such Diseases imposed by a Divine Hand, no human power can mitigate, only *Sauls evil spirit*, of a melancholy Devil, *Dauids harp did mitigate*, but did not cure; *Samas* 4. 23. To God all things are possible, whose Hand can only help what the same hand harms; as *Miriam's Leprosie* was cured by the Prayer of *Moses*, Num. 12. 13. Hence it is to be concluded that some Diseases are incurable, and there my Pill must needs fail: but in Natural distempers they fail not; For my part I take the Pills once every

Week

Phula radis solis extracta,

Week, though I am not troubled with any Disease, only for my Healths sake, and to prevent Diseases, and I find much good by them, for about the sixtieth year of my age, I felt some stiffness in my Limbs, and in regard of my age, I was afraid I should have fallen into such a Distemper as I had twenty years ago, for then I was so lame (and nothing seen) yet in so much pain that I desired death rather than life. But as God would have it, it parted from me: and as it came of it self, I knew not by what means, so (by the Blessing of God) I cured my self of that Distemper: that is I applied my self to these Pills, and by the Blessing of God upon them I was set at Liberty, and my Limbs were as nimble as they were thirty years ago; for now I can Leap, walk, or run, with ease and refreshment, which before was a burthen to me, and I find them in my self to be a great Restorer of Nature, for I have used no other Physick about this 12 or 14 years, and I intend to use them as long as I live, for I find that they strengthen me very much, ever since I began to take them: and at this time (through the goodness of God) I am not sensible of any Distemper upon me: and although the Winter 1662, was cold and long, yet no Waist-coat did come on my back, day nor night, which I had not gone without for thirty years before: One thing also in regard of my Age, makes me marvel, that I am grown two inches bigger in my body within these twelve months.

I have also a preparation from the same matter of this Pill, with a little Addition to it, will cure those that have been deaf many years, these Pills are to be taken as the other, and the price 5 s. the box,

And I'll tell you, as these Pills are Extracted from the best of Minerals, so they are the best of Medecins, and not to be made without great Expence, much Pains, Time and Operating in the Fire, the which is something tedious now to me, being the 72 year of my age, only I am assisted by my Cousen *John Watts*: I have lived in the Parish where now I live, these 18 or 20 years, and have wrought from Animals, Vegetables and Minerals; and although I have found out many pretty Experiments from the two former, yet I affirm Experimentally, None like the Mineral Kingdom for Medicins; from which (through the goodness of God) I have gained this great Secrer, which is the best that ever I knew, or care to know, nor do, or shall any know it, but them that I have Informed you of.

It is objected by some, that the Pill in some bodies doth not operate upwards and downwards, as some Physick usually doth: yet my Pill, under God; enough (insensible, it may be in some bodies) the operation may not be over in a day, or two or three after; It works by expelling wind, water and by sweat and (if need be) in due time by Purge or Vomit, (if there be cause.)

Forasmuch as my Pill is well known through most parts of the World, to be a soveraign Remedy for any Diseases, Seamen and Merchants (from experience) having communicated them almost into all parts; some there are that seek to counterfeit my Pill, which Pill they understand as well as *Washams Calf*, for it requireth a better wit then lieth in any of their heads; to know the Materials, the Fire and the Water, the Order and the Time to be observed in making thereof; which I have not gained easily, but by long and chargeable experience: But if any of them be able to convert the blood of

the Serpent into a Salamander, able to endure a violent fire, and take from him his blood, soul, and spirit, and throw him headlong into the Salt Sea, that man shall be like another conquering *Jafin* deserving great honour, but these deserve an ——— rather.

I understand also by some Persons, that there are great Disputes and Conjectures amongst men, what my Pill is made of, some say it is made of *Turpetum Minerale*, others of *Sulpher of Antimony*, and some say it is made of *Crude Mercury* or *Quicksilver*: but not one grain of either of these did I ever use to the making of my Pill. So much for the Negative. It matters not what it's made of, it being so safe and harmless, that women with child do oistantly take them, and much good they find by them, for they strengthen both them and the child. And I do conclude in the Affirmative, it is good for any Disease (as I said before) curable by Physick.

Now that none may be deceived for after time in buying Pills for mine which are not, I therefore first declare to all that shall read these lines, that the Pill was never taught me by man, neither do I know any man that can make them but my self. But since the Printing of my Book, *May* the 2. 1664: I have given my Secret to three persons, one of whom in regard of his Greatness I dare not mention, considering what *Solomon* saith, *The Kings wrath is as the roaring of a Lyon, but his favour is as the dew upon the grass*, Prov. 19. 12. The other two are, as I told you before, my friend, *Mr. Tho. Eyge*, and my Nephew *Mr. John Watts*, of whom, or of them they appoint, the right Pills can only be had after my death.

Now forasmuch as my aim in making this Medicin, was that all might have benefit thereby, I have so ordered the business that they are to be sold for me in several places of the Nation: but be careful to buy of those whose names are in my Book, I have done enough to keep you from being cheated both now and hereafter, if you are wise; if not I cannot help it. To prevent it if possible, I shall inform you that the great pretenders to know and make my Pills, are several servants that have lived with me, both male and female; now if these thievish servants had stole no more of my Pills, than they did of the way to make them, it had been some hundreds, if not more in my way; for they are as little skilled in the preparation, as an Horse is in Hebrew: And though every one of them make Pills different from one another, yet they will all assert they are mine, though never a one of them is so truly. The trick they have to vend them by, and put them off with, is that which takes only with simple folks, that they shall buy them cheaper of them; but it's dear enough that they pay, which take them with the loss of their lives, or sell them to the loss of their credit for them: for if there be an unskilful hand in such preparations, the best Medicin will degenerate into the worst and most pernicious.

I am informed they much desire my death, supposing that then they may clear the world without controul: but I have ordered the business so, that you may be saved out of such Rooks hands, and buy for many years to come at mine own House, of my Nephew, such as I have taken care to prepare and provide for posterity when I am dead; they being better for being older.

In this Tract are presented several Cures to your view, and a thousand more might be added, but I need not have mentioned these, but to make some ashamed of their belying to generous and general a Remedy, and because they have been before now often Printed I shall give you the briefer Account.

I*ane Newbury* in the Parish of *Antony* near *Plimouth*, by a grievous Distemper in her head and eyes, at length became blind, was judged by several persons, from whom advice was desired, to be incurable; at last by the counsel of Mr. *A. F.* Practitioner in Physick in the same Place, she made use of these Pills and in a short time found great amendment, and a little after a perfect Cure, and enjoys perfect Health and Sight. Octob. 19. 1674.

Edmund Herring's Child of *St. John's* in *Cornwal*, being sick and weak for a long time, was under several Physicians hands to little or no purpose, and grew into a Consumption, as was judged past recovery; but at last they took themselves to the use of these Pills for the Distemper, which had that happy effect as to restore it perfectly and is now a lusty lively Child.

John Blackelere Master of a Vessel at *Plimouth*, having strained himself by excessive labour, when his Vessel was in danger of being over-let, had an extraordinary Tumor also afflicted him by means of it, for which he used many Medicines but in vain, till at length he used these Pills, which did compleat his Cure.

Balthazar Rawlings coming from *Newfound Land* to *Plimouth*, was lookt on by the Doctor and Master as dead, and the Mariners were about to throw him over-board; but some small Symptoms of life remained in him; being put ashore, he lay at one *John Fleetwood's* House in *Plimouth*, eight or nine days in a most deplorable condition, and at last fell to the use of these Pills, with the Operation of which he evacuated almost an incredible quantity of corrupt blood and putrid matter, viz. eight or ten times a day about two or three quarts, which made him a sound man, and he went hence into His Majesties Service.

John Langham in the City of *Exon*, having an Impostume gathered in his side, was left by several Doctors as incurable, he growing worse under all their means, at last resolved upon the use of Dr. *Lockyer's* Pills, which did by degrees through Gods blessing make him perfectly well; the Operation of the Pills bringing away all the impostumated matter and the bag which did contain it, and much congealed Blood with it.

Arthur Fisher of *S. Tho. Southwark*, cured of a violent Spleen, which had been his Companion for 30 years, and under all the means his friends and himself could obtain, could procure no help.

The Wife of Mr. *John Pitts*, late of *London-bridg.* Instrument-maker, being forced to the taking these Pills as her last refuge for an exceeding gnawing pain in her bowels, upon the taking 5 of them voided in less then 5 hours by estimation 500 worms, and cleared of all her pain and her worms together.

Mr. *Cook's* Child, a Tanager at *Rygate*, cured of the Convulsion Fits, after all hopes of Cure was past.

Or Dr. Lockyers Universal Pills.

Mrs. Anne Parsons of Muchwenlosh, cured of the Kings Evil; to the great wonder of all that knew her.

Elizabeth Munns wife of William Munns, of Sheffield in Yorkshire, having her breast Cancerated to that degree that all the Physicians gave her over, yet for 10 s. cost was Cured, and has since that a living Child, and does at this day give suck; and her breast sound.

Mr. Barton, 70 years of age, of the same place, with a dropical tumour that fell into his Leg, was so very bad that the Chirurgeons could do no good on it, but at last came to this that the Leg must be cut off, or no Cure; yet after all, was Cured in a months time, and is at this day a sound man,

Friends,

These are to acquaint you, that in the year 1673. I was very much afflicted with the Stone, and the pain was so grievous that I could take little rest, or walk upright for certain days, at length being perswaded to make trial of Doctor Lockyer's Pills, in the use of which, through God's blessing, the Stone dissolved and came from me in small stones and gravel, of which I voided an incredible number, part of which I have yet by me, to the number of near an hundred, but have lost many more: I thought convenient to mention these things for the encouragement of such as have like trouble, no more but rest

Lyn, Feb. 19. 1675

Robert Fawcner,

Jacob Tyre at the Oil-Mill without Lyn South-gates, his Daughter having a dry fore head for a long time, and used many Medicines to little or no purpose, only most of them would take it off for the present, but it would come again; at length they concluding it to be a scald, they went to one in Lyn who is a professed Artift in such Cures, but when the Artift saw it, she would not undertake it unless she might pluck off the hair, which the Childs Mother would not yield to, but followed the Child with the Pills as she was directed, and so the Child received a perfect Cure in a short time, and remains sound to this day, and it is some years since.

John Gursen of Woodham-Ferres, Essex, after he had spent above 10 l. in Doctors and Physique, for the scurvy, wind-gout and wind-colick, being never the better, took Lockyers Pills, the first two boxes enabled him to go about, the second two boxes made him perfect well.

John Day of the same Parish, was troubled with the Dropfie, Wind-gout and Sciatica for some years, and when he was confined thereby to his chair, and as he said, going into the ground, despairing of recovery, because he found no relief from the advice of his Physicians; was by four boxes of these Pills restored to his strength and freed from pains, and continues so without any return thereof.

A Merchant of Devon troubled for twenty years with a bloody Water, was recovered of this sad Distemper by these Pills, when he had spent many pounds on other means to no purpose.

A Gentlewoman of Exon through great weakness often miscarried, and being perswaded to these Pills when she was with Child, found the

happy effect in going her out her time, and hath now a lovely child,

Mr. *W. Veal* Minister of *Edsligh* in the County of *Devon*, had a Child very sadly afflicted with the Kings-Evil, which was cured by these Pills, after many other means had failed.

Mr. *John Warren* Merchant in *Exeter*, was taken very sadly in his Limbs, so that he could not go, many means were attempted to no purpose, till he took these Pills; he was so weak, especially in his hands, that he could not button his doublet; but after he used the Pills, he increased in strength at this rate, that he could one day bear one pound weight, the second day two pounds, and so on every day proportionably increased in strength, and continues strong and well ever since.

I Think it necessary to give an account of the benefit I have received by God's blessing in the use of *Doctor Lockyer's Pills*; I was sorely afflicted with a fore humour in my Legs, and I tried means to divert the same, but to little or no purpose, for by the means I used, all the benefit I received was this; the swelling would be asswaged in the morning, but would be as ill again before night, until at length being perswaded to take these aforesaid Pills, by which in short time I received a perfect Cure, and have remained more healthful ever since (for which I bless God) and it is now near three years since. I know also that the testimony given by *Robert Fawceter* is truth and shall be asserted by

Lyn this first day of the
first Month 1676

John Rice.

John Hull of *March*, bought all the Pills I had, and he told me what a great Cure they had done to a Child of his four years of age, that was bursten, that he administred some of these Pills to it, and that he had perfectly cured his Child, and that it was very sound and well.

I had another of *March* that came to me yesterday, and he told me he had been with the King for the Evil he had on both sides of his neck, with three or four holes on each side, and he was wished by a friend to come to me for half a box of my pills, and in taking of them in one fortnights time, is perfectly cured.

Nov. 2. 1675.

Godmanchester.

Your Friend

John Tyssn.

Mr. *Robert Havercamp* Case stated by himself to me.

Having received some wounds in the fleshy part of my thigh about two and twenty years ago, which were ill cured at first, it did with some intermission frequently break out and turn to a fistula, and this last Summer brought upon me a desperate lameness and pains to the very small of my Leg, together with a violent Fever, and indeed I was even at deaths door: The Chirurgeons would not undertake it, unless I would consent to have my Thigh opened

Or Dr. Lockyers Universal Pills.

opened to the bone and pay forty pounds for a Cure; the latter whereof did startle me more than the former: So upon your Encouragement I made use of your Pills only, which by Gods help, did so vanquish the humour that fed the part grieved, and also all other Distempers Caused thereby, that in nine weeks I was perfectly recovered, and so continue, to the admiration of all that knew me in that weak condition,

At *Salt-Ash* in the County of *Cornwal*, one *Mrs. Ann Binny* having her Lips Distempered with a corrupt blood, for several years together: her Husband (being a rich man) made use of several Physicians, who drew from him at least forty pounds, but from his wife not the least of her Distemper, but being perswaded to the use of these Pills, was perfectly cured without the help of any other Medicin.

Also in *St. Stephens* by *Salt-Ash* one *Phineas Harwood* a Boy of seven years old was perfectly cured of the Kings evil, having no less then fourteen Running Wounds on him (when he began to take them) and the Corruption that was wont to issue out of the Wounds, the Lad vomited up at his Mouth.

Likewise one *Thomas Skine* of the same Parish, was bruised in several parts of his Body, insomuch that he was very sick (as was supposed unto death) was perfectly cured by these Pills only, and that very suddenly.

One *Briget Axford* of the same Parish, being in a deep Consumption (as was generally thought) with the use of these Pills was perfectly cured, to the wonder of all her Neighbours, though they had no visible Operation on her Body in at least ten days after her taking them.

One *Mrs. Dixon* was troubled very sadly for two years at the least, with griping gnawing pains in the Belly, and by the use of these Pills and Gods blessing upon it, was cured: For before she had taken of my Pills six times she had a live Worm came from her by Siege four yards long. The Woman lives in *Deadmans Place* in *Southwark* near unto the Colledge-gate, her Age is about thirty four years, the Worm came from her the latter end of *May*, 1663. If any desire to see the Worm, I have it by me. She also voided another which was seven yards long.

I shall acquaint you of one *Mr. Tomlinson* at the Sign of the Golden Hat and Feather in *St. Olaves Street*, who had an Ulcer in his Head, which for three years time put him to great misery, and no small expence of money, in which time he had made use of Doctors and Chirurgions, but none could reach his distemper; but by the blessing of God, taking my Pills, they have done it, which is such a Cure that makes all men that know it wonder: for I think such a Cure can hardly be produced.

A Friend of mine coming into the company of a young man, who having the *POX*, made his Condition known to my Friend, who gave him but two Boxes of my Pills, and in three weeks time he was perfectly cured, although he scarce went to bed sober all that time: and within three weeks after he married a Wife, and both of them very well to this day; This was done in *December* 1662.

One thing more I cannot pass by, to acquaint the World withal, Concerning a man in a very sad Condition : For the first time that I came to him, I found him sitting in a Chair, and his Legs laid up upon another Chair, and so full of pain that he was not able to rise out of the place, but by the help of his Wife and Servants. He had kept one in his house some five months, who did administer unto him, but in all that time he found no good; then he took one box of my Pills, and he took them from two to three, four, five and six, and so on, daily increasing, till he took fourteen at one time, and in taking out the whole Box, they never gave him a stool extraordinary (as he thought) nor any Vomit, neither could he find himself one jot the better. Small encouragement (a man would think) to take any more; but I told him, if ever he were cured it must be by these Pills; then he took another Box, and whereas he took till he came to fourteen of the first Box, he could take of the second Box but three or four, because they then wrought so strongly upon him both by Vomit and Stool; and then was the man in good hope of Cure. Well, he took a third Box, and before that was half spent, they broke him out all over his body into Scabs, and sent out his Distemper with a Pox.

I set down this example to convince some persons of their Folly, who have had some Distempers upon them many years, and they think by taking of my Pills four or five times to be cured, and if things be not presently according to their expectation, neglect and slight them; not considering that a Tree, and so a Disease, that hath had a long time in rooting will require so much the longer time to root out again: But to all such persons I say I had rather they would let alone my Pills, and keep their Money and their Diseases too.

Sir,

At *Camden in Gloucester-shire*, I gave of your Pills in number eight, to a poor man afflicted with the Stone, and his Urine had been stop't for two days: In four hours upon their operation he had ease; and taking a Dose every morning for a week many small Stones and much Sand came away by Urine.

A woman who by the *Lues Venerea* had almost lost her speech, her *Mouth* being so swelled and the *Fauces* ulcerated, that she could but whisper, her feet and legs suffered pains like those of the Gout; in the taking of a Box and half of these Pills, was restor'd to her speech and quit of her pains.

These with many more were communicated from one experienced in Physick.

The Wife of *John Wilson* of *Bourn* in *Lincolnshire*, was swell'd with Dropsie and Tympany as big as two women, and judg'd past recovery, was after two years illness cured by these Pills in a little time.

LETTERS.

LETTERS.

Most Honoured Sir,

IN general I have found the operation of your Pills to be safe and admirable to remove such infirmities as other Physick cannot reach; more particularly I have experience of their efficacy in mine own Family I my self have been sickly from my youth up, and have taken much Physick, but never any to be compared to them, for my infirmities increased and natural strength abated yearly, till I met with these excellent Pills. The first occasion of my taking them was an extreme Pain in my head of long continuance, I feared an Impostume, but after I made use of your Pills, I was soon freed from that pain, and also from divers other infirmities, my health and strength renewed to the admiration of all those that knew me formerly: I gave them to my younger Daughter, sickly many years, we feared a Consumption; to mine eldest Daughter, troubled with a Tumor in her Ear, the pain so violent that we feared either immediate Death or distraction, but through Gods blessing on your Pills, they were soon rid of their Infirmitie. I gave them to my Wife, much subject to the Palsie, and great benefit she finds by them. This good success in mine own Family emboldned me to recommend them to many others who find them to be excellent in very many and great distempers and diseases, both acute and chronicall.

Your much obliged Friend

and Servant

William Hewson.

Dublin, Dec. 17. 1664

Reverend Doctor,

I Thought good to give you a Relation of the rare effects of your Pills with us in Ireland.

A Servant of my own, *William Mathews* by name, my Steward, being abroad in my service, was taken seven miles from home, with a violent Stitch in his side, so that being necessitated to ride a foot pace, was not able to stand still nor speak, but groaned in most terrible manner with pain: judging it to be a Plurisie, I gave him four of your Pills, which gave him so much Ease, that he fell a sleep, and after one hours waking gave him a Vomit, which eased him so much that he rested well all night, and the next day rose, and was pretty well.

To one about twelve years of age, troubled five years with a very great Belly extreemly hard, I gave some of your Pills bruised in White-wine, which wrought most upward, and sometimes downward, and sometimes operated no way visible, yet in a months time brought the bigness and hardness of her belly down.

Another of my servants about *Christmas* last became diseased with a languishing Sicknes, a hollow Cough, loss of Stomack, flesh and spirit, so that he could digest no sustenance, and was in effect a dying man; I gave him some of your Pills, which before they operated made him so sick, that he thought he should have died, and about three hours after he vomited twice a full Melancholy and Cholery; and making him some comfortable Broth he took it, and

and thought he should have thrown it up as formerly he did all that he took, but it laid with him. Being very weak, and the weather extream frosty, I durst not give him of them often, yet when I thought convenient, I gave him again and again, which wrought both ways with him, and most commonly what he voided upward was a glutinous substance, much like the stuff that comes from an old Ulcer, of a most ugly colour and great quantity; but in the end, with the Blessing of God in two months time he was able to ride, work, eat heartily.

Another of my Servants was taken with an Head-ach, and a pain in his left side, and all night both were so violent, that he was in a high Fever, I gave him three Pills, and about two hours after they gave him a Vomit, which took away much of his pain, and Fever away, so that he rested well that night; and the next day I gave him more Pills, which did not visibly operate; and the next day he was well.

A woman being troubled for two years with often Faintings and Swoonings, sometimes twice a day, sometimes once or twice in two or three days, was by your Pills cured, which brought up much Water, Choler and green stuff.

I have been my self troubled with the *Hypocondriack Melancholy*, and some time past, the effects have been very tedious and bad; I have these three months past once a week taken of your Pills, and find good by them, and trust, with the blessing of God upon them, to live more healthful and comfortable then formerly.

I remain, Reverend Sir,

Dunblan near Dublin.

Feb. 4. 1664.

Your Friend, R.B.

Honoured Doctor.

HAVING this opportunity, I thought to acquaint you with the effect of your Pills upon my self in reference to my distemper (which is the Stone both in the Reins and Bladder) I have taken them at times near two years, and I will assure you I did never take them, but they did bring away Stones or Sand or both from me.

Except one time that I took them for an extraordinary pain in one of my shoulders, which pain was so exceeding great, that I could not move my Arm to put on my clothes, neither did I take any rest for two or three days and nights: then I took five Pills (which is my usual Dose) and I could not perceive them to work any where else about me but in my shoulder, where my pain lay, and they did quickly give me ease and cured my shoulder. I seldom find any pain or heat in my back or reins, but if I take Pills, I am sure to be well quickly. Not long since I was taken with a violent pain in my back, on the left side, where I used to be pained with the Stone, which continued from Monday noon till Thursday morning, all which time I was in much pain: the Thursday morning about five of the clock I took five Pills, which in less than two hours gave me much ease, and I did perceive the stones move down into my bladder, where they did cause much pain some days; then I voided one great Stone, as big and of the same form of a small filbeard kernel, it was so big that

Or Dr. Lockyers Universal Pills.

By

that when I saw the top appear, I was forced to pluck it out with my fingers, and with it came many more less; that afternoon I voided above seven score, and the next two days about forty more, since which I have felt little pain.
Sir, I shall onely say this, that according to my knowledge they have done many people good, but did never know them do any one harm.
Sir, this is all at present from him that is,

Windsor June 5.
1665.

Your highly engaged Friend,
John Duncombe.

Noble Doctor,

I Have (with some small intermissions) taken your Pills these fifteen Months, the necessity of my disease forcing me to make a full experiment of them. When I began to take them, I may truly say I was *deploratus à medicis*, having suffered much from divers learned and worthy men, without any success, besides the increasing of my Prison-diseases, which were *Scurvy*, *Dropsie*, *Wind-Gout*, (the last the worst and most tormenting) These complex and contrary Diseases, I laboured under for three years in my Prison, in which, what was administered against the one, brought and increased the other upon me. Sir, I intend not to trouble you with any large Discourse, I know it would be tedious, only in thankfulness to God, from whose Influence and blessing alone depends the efficacy of every creature, and in due acknowledgments to you, I think fit to let you know, that by the blessing of God upon your Pills I am (so far as I know) perfectly cured of the *Dropsie* and *Scurvy*. When I began to take them my teeth were ready to fall out, and my gums festered like a gall'd Horse back, and I was swelled from head to foot. And as for my other tormenting Disease (the *Wind-gout*) though I cannot say I am perfectly cured of it, yet I bless God it is so mitigated, that it's tolerable, and though it doth return upon me, yet holding on in taking your Pills, they always prevail against it, (though with great strugglings) and it grows less and less. The manner of working these Pills is so various, that I believe none can promise how they will work three times together, sometimes by Vomit, sometimes by Stool, sometimes by both, sometimes by neither, but most constantly by Spitting, and ever concluding with the old Wives remedy for the Wind. The truth is, their operation is as if they were Rational rather than Natural Agents; what they find at present most annoying or threatening Nature, that they fall upon by affording and applying to Nature a succour and vertue against it. Sir, God has put a great honour upon you, in making you the instrument of bringing this rare Medicament into the World for the good of Mankind, the like to which I do not think hath been since the World began. Sir, I am bound to subscribe my self,

Tower, May 1.
1665.

Your very thankful and obliged Friend
and Servant. J. Downs.

C

Sir,

Sir,

I Shall here declare what the goodness of God hath done for me by the means of your Pills; I had some nine or ten years ago taken, by means of my employment at that time, exceeding violent Colds one after another, which did occasion a wind and a water together in my flesh, at some times to such a pain, that I had no rest night nor day, but was so torn, that I could not contain my self from crying out many times in much bitterness, yet no swelling or any thing to be seen. I was so lame that sometimes I have been taken off from my employment six weeks, sometimes eight weeks, nay, sometimes more than ten or eleven weeks together. Then it pleased the Lord I heard of your Pills, and took the quantity of four or five Boxes of them, by which means I doubt not but there is perfect cure wrought upon me, besides some other inferior distempers quite removed; so that through mercy, I am in very good health: I desire to give God the glory, and you thanks. So I rest

From Martins Lane in Colchester,

Thy Friend in love,
Will. Pryer.

London, June 14. 1665.

Sir,

HAVING had experience of the incomparable virtue of your famous Pills I have thought good in gratitude to give you an account of the benefits I have received by them about *August* last, by the persuation of some friends seeing me in a very sad and deplorable condition, having then been under the Doctors and Chirurgeons hands nigh twelve moneths for the cure of a *Fistula in ano*, but found no help for them, but rather after much torture and despair in my self ever to be recovered, I did procure a box of your Pills, which did to my admiration, within three weeks that I made use of them, take away the pain and cause of the Distemper, so that I was able to go healthfully about my occasions; and in *November* last, rid on horse-back three or four hundred miles.

Your faithful Friend and Servant.

Nich. Hudleston.

POST-

POSTSCRIPT.

I Being at my Brothers in *Lincolnshire*, his wife lay Bed-ridden, and had so done for some months, the night before I came thither, her neighbours did not expect she would live till the next morning; about a month or two before she had her thighs and legs lanced and cut for the Dropsie, she having been diseased six or seven years, and could get no cure; hearing some discourse of your Pills, desired me to give her half a score of them, which I did, and she making use of them, recovered, so that within a fortnight I had a Letter from my Brother for a Box of your Pills, with an account that his wife was then able to go about the house.

From the *Three Horse-shoes*
near *S. Dunstons-Hill*.

Id. N.H.

Friend,

I Have sent thee the mans own declaration of what thy Pill has done for him. he is an honest man, and hath spoken nothing but the truth; and as for my self I was so lame with a pain in my huckle-bone for three years, that I went in much pain with a staff and with sore legs for twelve years, so that I was in such misery, that I could not rest night nor day; and when I came to thee first, I could not get on a shoe on one foot: and it broke out of my hips with a salt Rheum that I could not sit, nor lie down; but in such misery, that when I rose up from the place I either sat or lay down on, I thought my flesh would have come from my bones; but by the goodness of God upon thy Pill, I am now in bodily health, and in my limbs. Under my affliction formerly I could not go from my house a quarter of a mile without resting three or four times, now I came from *London* in less than a day and an half. My wife remembers her kind love to thee.

From *Colchester* the 10th.
of the second Moneth.

Thy loving Friend
Joseph Rieve.

My honoured worthy Friend,

MY first to you like the blind mans arrow, I got me that which in twelve years time hath for the present freed me of such a Distemper and Dist case, being the Scurvy and Dropsie; that all my Doctors skill with much cost and pains could not do, far beyond what I can express in Paper; ever blessed be his name that taught it you, and you also for your love in sending me one Box and Book.

Alchester, Septemb. 24.

Your ever thankful Friend and Servant,

Sept. 1666.

John Lockyer.

Honoured Doctor,

THE good affection I bear to you upon the Repute of your Pills obliges me to give you a demonstration of the names of some persons which they have done perfect Cures on; and have also inserted the place of their Residence, as followeth;

1. *Thomas Readsey* living at *Stanhly* in the County of *Durham*, dangerously ill of a shaking Ague, was perfectly cured.

2. *Margaret Farlse* living at *Hedley-Hope*, extremely ill at her Stomach, in very short time was perfectly cured, and many Worms cast up in her Vomit.

3. *Mr. Wasley's* Daughter of *Newlands* extremely ill of a Fever, was by these Pills cured.

4. *William Wrane* living at *Billirow*, dangerously ill, and his body brought extream weak by bad Digestion and Melancholy, was with half a Box perfectly cured.

5. *George Barley* living at *Lowraw*, a Distemper came upon him so violently, by drinking cold Water when he was extream hot with working, as no body thought he could live, with half a Box was perfectly cured.

6. *Henry Marshall*, near three score and ten years of age, living at *Standley*, being extremely troubled with a Tumor in his Leg many years, with taking half a Box was perfectly cured.

7. *Mr. Fressell* living in *Durham*, having such a pain in his Bowels as the Physicians gave him over, was by these Pills perfectly cured.

8. *Jane Hedley* living at *Hedley Hill*, dangerously ill of a Fever, with a dozen Pills was perfectly cured.

9. *John Arrowsmith's* two Children living at *Cornsey*, were both perfectly cured, the one of the Rickets, the other of a Lameness in his Joints, which had made him a Cripple some years.

10. *Luke Harle* living in *Newcastle*, having been long and grievously troubled with a *Fistula*, though much helped by other means, yet was never perfectly cured until he took Doctor *Lockyer's* Pills, which took away the very cause of his Distemper, and so is perfectly cured.

11. *Mr. Anthony Lorain* of *Walker*, very much perplexed with a violent Head-ach, with taking half a Box of these Pills was cured.

There are many which have been almost cured, and have found abundance of good by them, but I shall name none of them; and this I can onely say, I have heard of none that ever got harm by them.

From *Hedley Hope*,
Jan. 13. 1667.

Sir, Your humble Servant,
Charles Sanderfon.

One *Mr. William Hocknel* a Joiner in *Oldstreet, London*, having suffered four years lameness in all his Joints, and having spent the greatest part of his substance on Physicians, and all to no purpose, at last fell to the use of this single and singular Medicin; which in a short time, to the wonder of all that knew him, restored him to his former health and strength. Since which he persuaded a Boy (whose name I know not) to take the said Pills, (which Boy had been in *S. Bartholomews* Hospital for some months, and turned out as incurable) and in taking about four Boxes he was perfectly recovered. I shall refer you to the said *William Hocknell* for a further account.

You my kind Country-men that desire to use these my Pills, the Secret of which was discovered unto me by Providence for your good, be very careful to buy them of some of these persons whose Names and Dwellings you find in this Book, and no where else, except you will be cheated. They are both made and sold by my self or my Cousin *Mr. John Watts* in my own house, and also by *Mr. Thomas Fyge* Apothecary, at the *Sugar-Loaf* without *Bishopgate*; from whom they are committed to be sold.

Or Dr. Lockyers Universal Pills.

LIONEL LOCKYERS PILL.

*Pillule radiis solis extractæ,**Directions for the use of the Pill.*

AS to the manner of its Administration, it is so highly prepared, that it may very conveniently, as well as safely, be administered to all kind of persons, whether young or old, strong or weak, Infants new-born, or old men where Nature is much decayed.

Every one that makes use of my Pill, must use Discretion in the Dose, (and in that be a Physician to himself) and take or give it, as strength and the Disease require, and then the Patient shall not fail of his end or desire, nor the Administ' of credit and honour. The general Rules for its use are these: They may be taken at any time of the year, either in hot or cold seasons. They ought not to be taken upon a full stomach. Those which are not acquainted with the manner of their operation on themselves, should keep within, or warmer than usual when they take them first. They may be taken at night after a slight supper, or none rather, or early in the morning, and slept after, if you will; or upon necessity, at any time of the day, as in Surfeits, and an hour or two before an Ague fit. To drink Posset-Ale with them when they work much, will be best, a draught of any other warm Liquor will serve the turn, though but small Beer; which need not be taken in three or four hours after, except they work sooner. He that takes of them onely for a Purge, and for once, may take about five at a time, which if bruised, and mixt with a little Honey or Wine, will scarce fail to answer his end. Those which take them for long Chronical Diseases, may begin at two, and so proceed daily to increase the number by one in a day, to seven, eight, or nine, or stop sooner, and take them whole as they be, which way they strengthen most, or beat them to powder, if they would have them to evacuate much. To children one Pill is enough for once, or two at most, and to weak children half an one may serve.

To secure the true Preparation in the hands of faithful and intelligent persons, I have given my Receipt to Mr. Tho. Fyge, in which I had no other design but the publick good, as I have many years declared; as also to my Nephew Mr. John Watts, Operator in my house, from whom you need not doubt of the true medicine, and all other pretenders to the knowledge of it, I disown and protest against, for all their living with me; and he that takes any Pills but of Mr. Fyge and Mr. Watts after my death, is deceived; for they onely know its due and true Chymical Preparation. The Pills are made up in Latten Boxes, and sealed with my Coat of Arms, and after my decease to be also sealed with the Arms of Mr. Fyge, to prevent counterfeits; and he and my Nephew may take what other course they will for that purpose. The price of a Box which contains about an hundred, a few more or less, according to their bigness, is 4s. and half a Box is 2s. and no where to be had but where the Book directs you.

A D V E R T I S E M E N T.

Since the decease of Dr. Lockyer, to prevent deceit and mistake, all the Boxes of Pills are wrapt up in white Paper, and sealed with his Coat of Arms, viz. Three Boars heads and the Arms of Tho. Fyge; which are the six Flower-de-Luces and three Spur Rowels; and in the papers are writ the names of Tho. Fyge and John Watts, by which means you may know his from all others: they are now sold by

{ Tho. Fyge at the Sugar loaf without Bishopsgate,
{ John Watts in S. Thomas Southwark.

F I N I S.
